Future BRCVPA Partners,

We are looking for a wide variety of professionals from our area to come speak with our students about their field of expertise as well as the skills, knowledge, and behaviors necessary to be successful at your job. We know you are a respected professional in our community, and would greatly appreciate your participation in this important event.

We are currently creating a schedule of presenters. We ask that you commit to being on campus from 9:00 a.m. to 11:00 a.m. Friday, October 26th. You should plan to talk with students for 10 minutes about your profession, job, and company or organization. Include interesting details, important skills, and what you studied to become qualified for your position. Don't forget to share what you love about your work also!

Please also plan to bring materials like brochures, display posters, or digital media representing your business to better explain and promote the work you do. If you have an activity you would like students to do that relates to your field, that would be great! We can provide more guidance on this if you need it.

Sydney Hebert will be your contact for this event. Please email shebert1@ebrschools.org if you are interested. Please include your location preference (indoor vs. outdoor), and any presentation needs you may have, such as a projector, easel, table, etc. Groups of students will rotate through your assigned classroom every 10 minutes. There will be 9 rotations with a short transition period in-between.

We truly appreciate your unique contributions to our community and look forward to your participation as we prepare students for a bright future!

Sincerely,
BRCVPA Admin Team

Candice Hartley
School Principal
